LUIS ALVAREZ

• Frontend Developer •

ABOUT ME

Hi, I'm Luis Fernando Alvarez, Frontend Developer and Ui Designer specialized in web technologies and aplications.
I was born in Mexico and from a very young age I liked computers and since then I have learned to create web pages and solve problems such as performance and refactoring.

EDUCATION

2015 - 2018 • Technical High School No. 145

2018 - 2021 • Study Center Industrial Technological and Services No. 120

EXPERIENCE

In my time as a programmer I have discovered new technologies, and I always try to learn new things and experiment by creating projects to test my knowledge.
And practice with more developers to gain experience.

I have 1 year of experience as a Frontend developer and since then I continue to create projects and improve my skills but not only in code but also in work methodologies and organization.

I also have 8 months as a designer, I use tools like Figma to create user interfaces and support more colleagues in the creation of their pages and web applications.

LANGUAGES

I was born in Michoacan, Mexico but since I met English at my school I wanted to learn it and thus be able to meet more people:

Spanish - Native
English - B2

SKILLS

Web Development	Mobile Development
Empathy	User Interfaces
Scrum methodology	React
Kanban methodology	HTML & CSS & JavaScript
Teamwork	TypeScript
